

What is claimed is:

1. A barbecue grill:
 - a) a gridiron disk;
 - b) a shaft extending from the gridiron disk so
5 that the shaft becomes substantially
perpendicular to the gridiron disk;
 - c) a bowl having a channel, wherein the shaft is
detachably received through the channel; and
 - d) a motor attached to the bowl to generate
10 rotation of the shaft.
2. The barbecue grill of claim 1 wherein the gridiron
disk is formed of a plurality of linear wires.
- 15 3. The barbecue grill of claim 1 wherein the gridiron
disk is formed of a plurality of linear and circular
wires.
4. The barbecue grill of claim 1 wherein the shaft is
20 detachably attached to a center of the gridiron disk.
5. The barbecue grill of claim 1 wherein the channel is
formed through a bottom center of the bowl.
- 25 6. The barbecue grill of claim 1 wherein the motor is
formed underneath the bowl.

7. A barbecue grill:
- a) a gridiron disk;
 - b) a shaft extending from the gridiron disk so
5 that the shaft becomes substantially
perpendicular to the gridiron disk;
 - c) a bowl having a channel, wherein the shaft is
detachably received through the channel;
 - d) a tray having a center opening, wherein the
10 tray is provided between the gridiron disk and
the channel so that the shaft passes through
the center opening; and
 - e) a motor attached to the bowl to generate
rotation of the shaft.
- 15
8. The barbecue grill of claim 7 wherein the gridiron
disk is formed of a plurality of linear wires.
9. The barbecue grill of claim 7 wherein the gridiron
20 disk is formed of a plurality of linear and circular
wires.
10. The barbecue grill of claim 7 wherein the shaft is
detachably attached to a center of the gridiron disk.
- 25

11. The barbecue grill of claim 7 wherein the channel is formed through a bottom center of the bowl.
12. The barbecue grill of claim 7 wherein the motor is
5 formed underneath the bowl.
13. The barbecue grill of claim 7 wherein the tray is partitioned to a first half and a second half, wherein the first half has a plurality of pores.
- 10 14. The barbecue grill of claim 13 wherein the second half of the tray is devoid of pores.
15. The barbecue grill of claim 13 wherein the first half of the tray is substantially embossed.
- 15
16. The barbecue grill of claim 7 wherein a lower end of the shaft is detachably fit in a top portion of the motor.
- 20 17. The barbecue grill of claim 7 further comprising a heat insulator between the bowl and the motor.
18. The barbecue grill of claim 17 wherein the heat insulator is formed in a staple format to include a
25 base and a vertical support raised from each side of

the base, wherein the vertical support serves to
allow an air gap between the bowl and the motor.

19. The barbecue grill of claim 7 wherein when the motor
5 is turned on the gridiron disk makes a clockwise
rotation whereas the tray remains stationary.

20. The barbecue grill of claim 7 wherein when the motor
is turned on the gridiron disk makes a
10 counterclockwise rotation whereas the tray remains
stationary.

21. The barbecue grill of claim 7 wherein the gridiron
disk is radially embossed.

15

22. The barbecue grill of claim 7 wherein the gridiron
disk is marginally stepped.

23. The barbecue grill of claim 16 wherein the lower end
20 of the shaft is substantially angled in a polyhedron
format.
